Anti-Ageing designed for you

A serum is a skincare product you apply to your skin after cleansing, but before moisturising. Not only is a serum the work horse of any skincare regime to deliver the fastest results, they also penetrate the deepest of all other products because they are made up of smaller molecules. They work into the skin cell layer, operating from the bottom up, to repair damaged skin cells, including collagen and elastin.

Is Serum a Moisturiser? Serums specifically deposit highly concentrated active nutrients, antioxidants, vitamins and minerals into the skin, whereas Moisturisers, although they contain some of the actives, provide moisture, hydration and protection for the skin.

What is the shelf-life of a Serum? Once opened they should be used within a 12 month period. If used every day, the bottle will last 3-6 months.

How are they applied? A serum needn’t complicate your beauty routine, but instead enhance it. Firstly cleanse your skin, then apply 2 pumps warmed in the palm of your hands. Be sure to target the face, neck and décolletage as these are the areas of your body which show the first and most visible signs of ageing.

Sothys have created an incredible range of Youth Serums. The six-product range is inspired by laser and LED esthetic dermatology techniques and formulated for specific skin concerns. With each Serum, Sothys have developed ingenious ways to target specific signs of ageing.

Call in and talk to one of our trained skin care specialist for the correct Youth Serum that will target your skin concerns.

Have you Faked It?

Our Black Magic Self Tanning Mousse will give you that holiday golden glow without anyone guessing you have actually faked it. Our Black Magic Tan is eco-certified organic, chemical free, yet provides an amazing natural looking colour. As well it contains anti-ageing properties of green tea extract, rosemary leaf and aloe vera. A finish that lasts up to ten days.

Hair Misconceptions

We have busted some of the biggest hair misconceptions so you know the simple truths behind great hair...

The Lie... Not cutting your hair makes it grow faster. The Truth... Of course this is a lie! The mid-lengths and ends of your hair do get a lot of love at times. Colouring, blow waving, curling and straightening are all factors that can create split ends, causing the hair shaft to 'split'. If the 'split ends' aren't attended too by a trim, the 'split end' can get bigger and higher up and hair shaft meaning once you are due for a haircut, more hair will need to be trimmed off due to the damage on the ends of your hair. So frequent trims are the best way to keep your longer locks healthy! And remember, your hair grows on average 1cm per month (bearing in mind this varies from person to person). Also a gorgeous Redken Chemistry Shot conditioning treatments helps to nourish and condition your hair! Add it on to any hair service for only \$15.00!

The Lie... Stress can make your hair fall out. The Truth... Although you lose on average 100 strands of hair each day, it's possible that you may lose a few more strands when you're "catastrophically" stressed. Meaning if you have had a major life change such as a job loss, a death of a loved one or sometimes, a divorce. Major hair loss (when patches fall out or when you run your hands through your hair and you have handfuls of hair fall out) however isn't caused by stress. If you are experiencing some of these symptoms, contact your medical professional.

The Lie... Dandruff is a result of having a dry scalp. The Truth... Suffering from dandruff and having a dry scalp are two different things. Dandruff happens when natural yeast deposits on the scalp react with it, causing skin on the scalp to shed. A dry scalp on the other hand can be caused by a lack of hydration, seasonal changes or if a shampoo and conditioner strips the natural oils off your scalp too quickly. Dandruff requires treatments like Redken's Dandruff Control Scalp Relief \$35, whereas plenty moisturising treatments are all you need for dryness. Redken Chemistry Shot Treatment add onto any hair service for \$15.00 and using Redken's Soothing Scalp Relief to help nourish the scalp \$35.

Exfoliating is not just for your skin!

Polish away dull hair with this pre-shampoo glass scrub, perfect to smooth and detangle before shampooing.

Benefits:

- The first step to a perfect, shiny blow-dry
- Moisturising oil-enhanced formula exfoliates with Argan Shells to gently remove impurities and enhance shine.
- Buffs away impurities and gently polishes to banish dullness and enhance shine.

How to Use: Use as a complete system with Diamond oil glow dry gloss shampoo. Detangle conditioner and blow dry shine oil. Apply before shampoo to wet hair. Rub in from mid-lengths to ends. Use 2-3 times a week or as needed. Follow with gloss shampoo, detangling conditioner, and glow dry shine oil.
